

Montano Real Estate GmbH appoints René Sellner as new Head of Fund Management

- René Sellner has many years of experience in customer service and sales
- He assumes overall responsibility for the management of existing funds and ongoing projects
- The start of a new cycle offers attractive opportunities for a proactive asset manager like Montano

Munich, 14 May 2025 - Montano Real Estate GmbH ("Montano", www.montano.eu), a highly specialized partner for investments in commercial real estate, has appointed René Sellner as its new Head of Fund Management. As of May 1, 2025, he has overall responsibility for the management of existing funds and individual mandates. He will also be responsible for managing and further expanding business activities with institutional clients.

"We are delighted to have gained René Sellner, an accomplished and excellently networked expert, for our fund management team," says Ramin Rabeian, co-founder and Managing Partner of Montano. "With his many years of experience in customer service, sales and fund structuring, he will play a central role in the further development of our fund products and continue to drive our growth in the institutional sector."

René Sellner previously worked in Munich, New York and London at GLL Real Estate Partners and Macquarie Asset Management, where he served clients from Germany, Europe and Asia. Most recently, he worked as a sales specialist at PATRIZIA SE.

"I am very much looking forward to the new challenge and working with the dedicated team at Montano," says Sellner. "In addition to providing targeted support to our institutional clients, I am keen to take responsibility for ongoing funds and projects. Particularly in the current market situation, I see great potential for jointly tapping into new opportunities and further developing existing products."

With the "Public Sector Fund I" launched in spring 2022, Montano is currently focusing in particular on investments in core real estate with state or state-related users. These include administrative, educational and healthcare facilities as well as infrastructure properties in the energy and transportation sectors. The attractiveness of this segment stems from the long-term rental structure with creditworthy public sector tenants.
